

# Rijan Dhakal

Full Stack Developer

Kathmandu, Nepal / [rijandhakal86@outlook.com](mailto:rijandhakal86@outlook.com) / [github.com/Rijan-dhakal](https://github.com/Rijan-dhakal) / [linkedin.com/in/rijandhakal](https://www.linkedin.com/in/rijandhakal)

## ABOUT

Full stack developer from Nepal, specializing in Next.js, Node.js, and PostgreSQL. I design, build, and deploy applications independently, from database to production, with a strong focus on backend systems and API design.

## PROJECTS

### DigiCapsule

[Live site](#) [GitHub](#)

Next.js · TypeScript · PostgreSQL (Neon) · Drizzle ORM · Better Auth · Cloudinary · Tailwind CSS · shadcn/ui · eSewa

- Built a full stack app that lets users lock messages and files until a future date they choose
- Implemented Google OAuth authentication and Markdown-based content editing
- Added a preview image and hint text so recipients get a teaser before the unlock date
- Built a premium tier with AI-assisted content improvement, rate-limited to 2 uses per day, gated behind eSewa payments

### TinyMeet

[GitHub](#)

React · Vite · WebRTC (simple-peer) · Node.js · Bun · Express · Socket.io

- Built a two-person WebRTC video calling app with real-time signaling over Socket.io
- Migrated the WebRTC layer from PeerJS to simple-peer to improve connection reliability
- Built a responsive Tailwind layout with mobile, tablet, and desktop breakpoints
- Enabled direct peer-to-peer audio and video calls, routing media straight between users without a relay server

### StreakUp

[GitHub](#)

Expo · React Native · TypeScript · Node.js · Express.js · MongoDB · JWT

- Built a mobile habit-tracking app with daily, weekly, and monthly frequencies using Expo Router
- Built a Node.js and Express REST API secured with JWT auth and bcrypt password hashing
- Implemented streak tracking with a top-3 leaderboard and swipeable habit cards
- Used MongoDB with Mongoose for habit and user data

### Ecommerce Backend

[GitHub](#)

Node.js · Express.js · MongoDB · JWT · Cloudinary · Nodemailer

- Built a complete REST API for an ecommerce platform with JWT authentication and OTP email verification
- Implemented product management with multi-image upload via Cloudinary and inventory tracking
- Built a shopping cart and order processing flow supporting Cash on Delivery
- Added role-based access control for admin and user accounts

## SKILLS

### Languages

TypeScript, JavaScript, Python

### Frontend

React, Next.js, Tailwind CSS, Expo (React Native)

### Backend

Node.js, Express.js, REST APIs

### Databases & ORMs

PostgreSQL, MongoDB, Redis, Drizzle ORM, Prisma

### Real-time & Jobs

Socket.io, Cron jobs / scheduled tasks

### Tools & Services

Git, Better Auth, Cloudinary, Firebase, Linux

### Payment Integrations

eSewa, Khalti, Stripe

Open to backend and full stack roles. [rijandhakal86@outlook.com](mailto:rijandhakal86@outlook.com)
